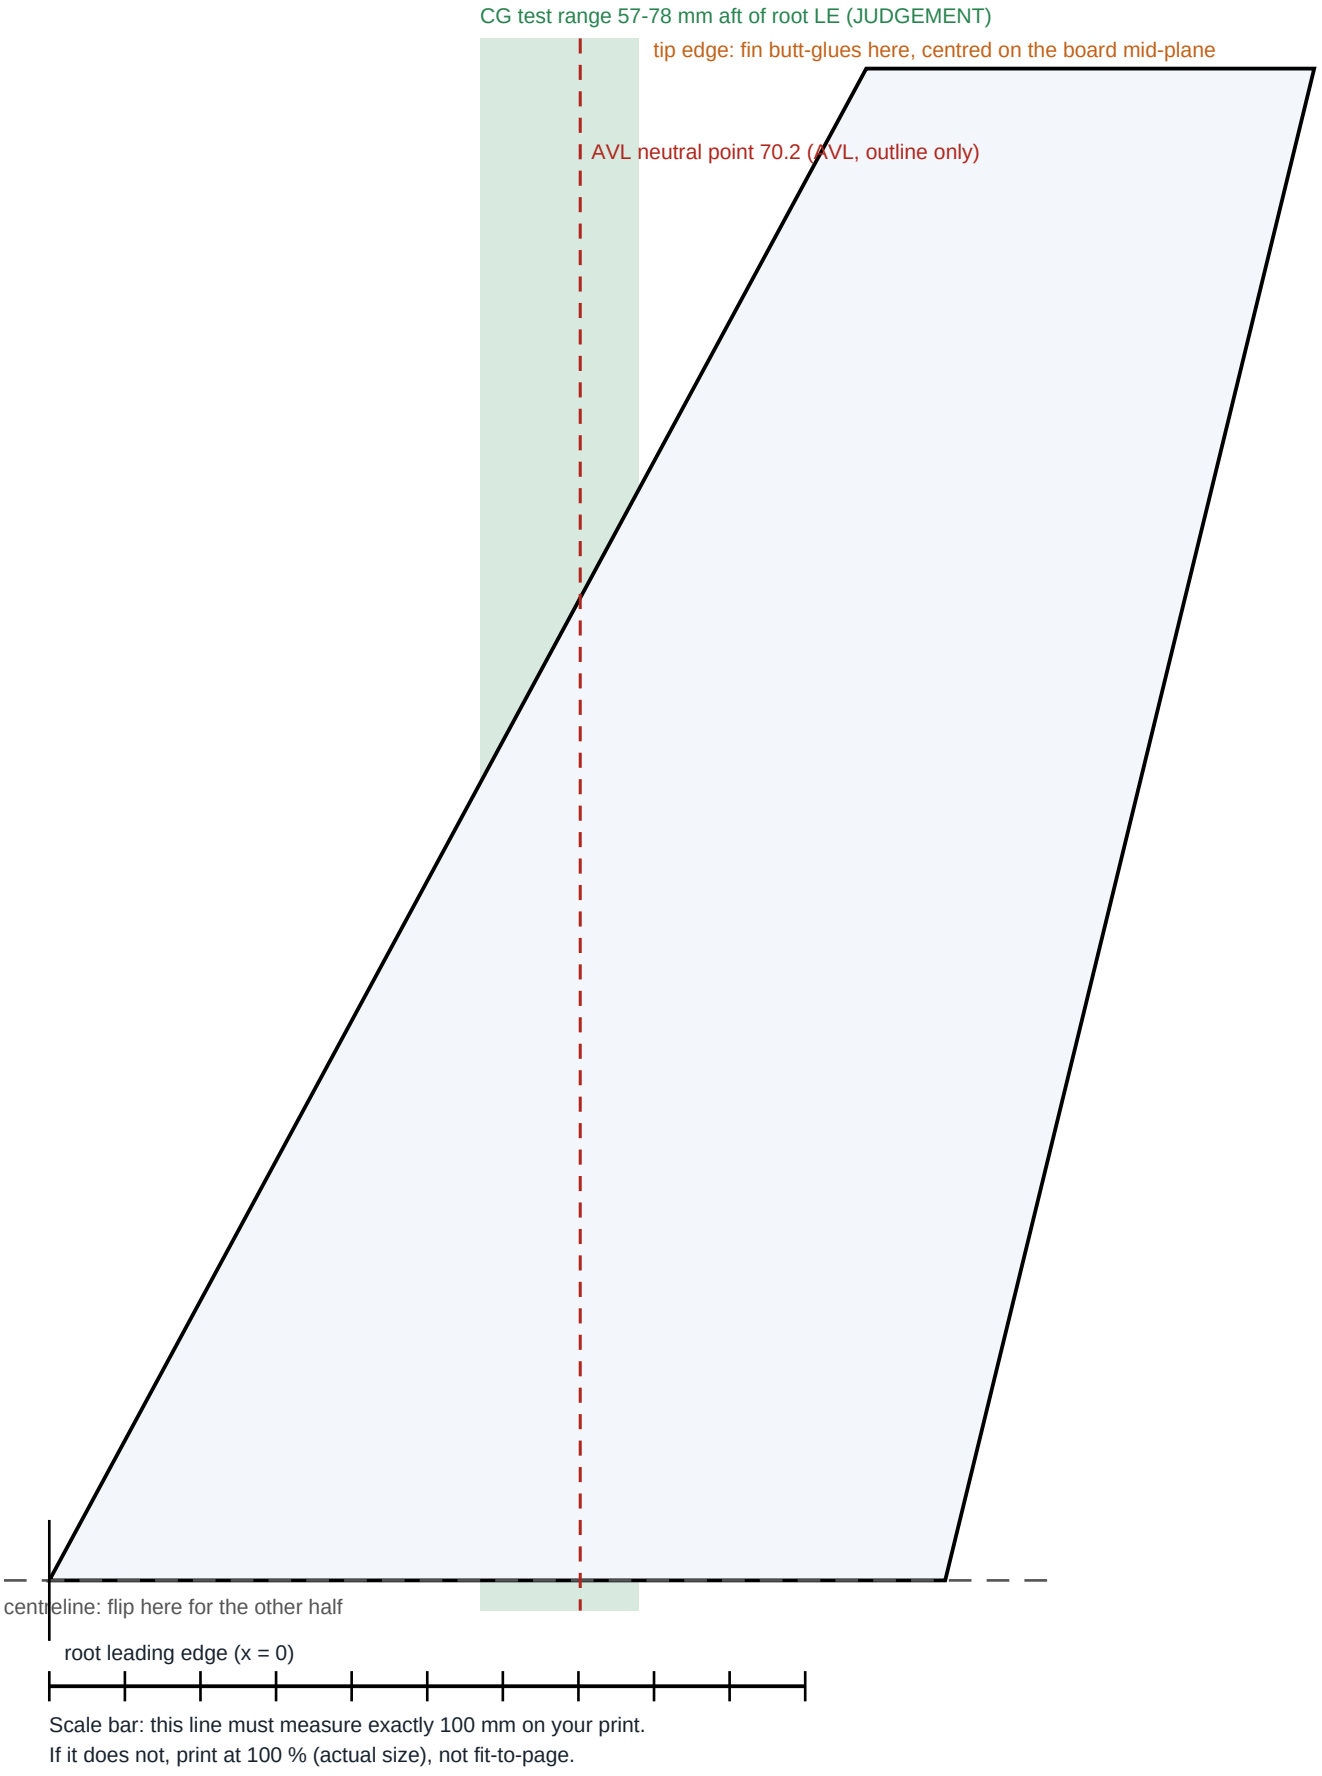
B45: ONE HALF of the wing, 1:1, US Letter portrait

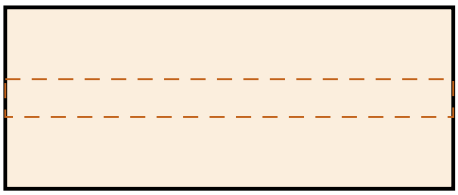
Foamboard 5 mm (ASSUMED: measure yours). Span 400, root chord 118.5, tip chord 59.3, sweep 25 deg, zero dihedral.
Cut along the solid outline. Trace it on the board, then flip the template over on the dashed
centreline and trace the other half. The wing is one piece. Print at 100 % (actual size).



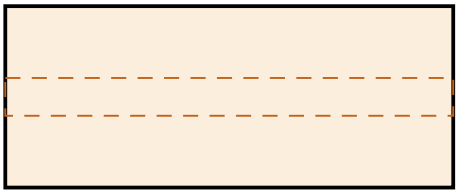
Scale bar: this line must measure exactly 100 mm on your print.
If it does not, print at 100 % (actual size), not fit-to-page.

B45: TWO tip fins, 1:1, US Letter portrait

Each fin 59.3 x 24.0 mm (chord = tip chord, height 24 mm x span/400): about 4 % of wing area. Cut two from the same foamboard. Butt-glue each to the wing tip edge, centred on the board mid-plane (no tabs). Check they stand square. Print at 100 % (actual size).



fin 1: 59.3 x 24.0 mm



fin 2: 59.3 x 24.0 mm

Dashed band = where the wing tip edge lands on the fin (board thickness, ASSUMED 5 mm, centred on the fin height). Re-mark it with your measured thickness.

Scale bar: this line must measure exactly 100 mm on your print.
If it does not, print at 100 % (actual size), not fit-to-page.
